Author Index Volume 125 (2000)

Andrew, A.L., Asymptotic correction of Numerov's eigenvalue estimates with natural boundary conditions 359–366
Antohe, V. and **I. Gladwell**, Performance of two methods for solving separable Hamiltonian systems 83– 92

Baker, C.T.H., A perspective on the numerical treatment of Volterra equations 217–249
Baker, C.T.H., Retarded differential equations 309–335
Bellen, A., N. Guglielmi and **M. Zennaro**, Numerical stability of nonlinear delay differential equations of neutral type 251–263
Betts, J.T., N. Biehn, S.L. Campbell and **W.P. Huffman**, Compensating for order variation in mesh refinement for direct transcription methods 147–158
Biehn, N., see **Betts, J.T.** 147–158
Bocharov, G.A. and **F.A. Rihan**, Numerical modelling in biosciences using delay differential equations 183–199
Borovykh, N. and **M.N. Spijker**, Resolvent conditions and bounds on the powers of matrices, with relevance to numerical stability of initial value problems 41– 56
Brown, B.M., D.K.R. McCormack and **A. Zettl**, On a computer assisted proof of the existence of eigenvalues below the essential spectrum of the Sturm–Liouville problem 385–393
Buckwar, E., Introduction to the numerical analysis of stochastic delay differential equations 297–307
Burrage, K., P. Burrage and **T. Mitsui**, Numerical solutions of stochastic differential equations – implementation and stability issues 171–182
Burrage, P., see **Burrage, K.** 171–182
Butcher, J.C., Numerical methods for ordinary differential equations in the 20th century 1– 29

Campbell, S.L., see **Betts, J.T.** 147–158
Cash, J.R., Modified extended backward differentiation formulae for the numerical solution of stiff initial value problems in ODEs and DAEs 117–130
Corless, R.M., see **Shampine, L.F.** 31– 40

De Meyer, H., see **Vanden Berghe, G.** 107–115

Elschner, J. and **I.G. Graham**, Numerical methods for integral equations of Mellin type 423–437
Engelborghs, K., T. Luzyanina and **D. Roose**, Numerical bifurcation analysis of delay differential equations 265–275
Enright, W.H., Continuous numerical methods for ODEs with defect control 159–170

Ford, N.J. and **V. Wulf**, How do numerical methods perform for delay differential equations undergoing a Hopf bifurcation? 277–285

Gladwell, I., see **Antohe, V.** 83– 92
Govaerts, W., Numerical bifurcation analysis for ODEs 57– 68
Graham, I.G., see **Elschner, J.** 423–437
Greenberg, L. and **M. Marletta**, Numerical methods for higher order Sturm–Liouville problems 367–383
Guglielmi, N., see **Bellen, A.** 251–263

Hackbusch, W. and **B.N. Khoromskij**, A sparse $\mathscr{H}$-matrix arithmetic: general complexity estimates 479–501
Hairer, E. and **G. Wanner**, Order stars and stiff integrators 93–105
Hsiao, G.C., O. Steinbach and **W.L. Wendland**, Domain decomposition methods via boundary integral equations 521–537
Huffman, W.P., see **Betts, J.T.** 147–158

Iserles, A. and **A. Zanna**, Preserving algebraic invariants with Runge–Kutta methods 69– 81
Ixaru , L.Gr., CP methods for the Schrödinger equation 347–357

Junghanns, P. and **B. Silbermann**, Numerical analysis for one-dimensional Cauchy singular integral equations 395–421

Khoromskij, B.N., see **Hackbusch, W.** 479–501

Li, S. and **L. Petzold**, Software and algorithms for sensitivity analysis of large-scale differential algebraic systems 131–146
Luzyanina, T., see **Engelborghs, K.** 265–275
